WORK EXPERIENCE

Full Stack Developer

Konfinity Infotech Private Limited

07/2020 - present

Tasks

- Designed and developed a responsive web app, where patients can book appointments from multiple hospitals using ejs, expressJS and mongooseJS. Build the RESTful API for many features including filtering/sorting of doctors. Other features are pagination, authentication/authorization with OTP verification etc.
- Designed and developed a web app using REACT to crawl medium.com by tags using NodeJS to fetch third party API and crawl websites with a great speed and also made it realtime using Socket.io. Crawling time for blogs was decreased for next time from 1000-3000 ms to about 10-30 ms by saving them to MongoDB collection.
- Made test scripts for testing frontend and backend of blog application using ChaiJS and MochaJS.
- Technologies : REACT, ExpressJS, NodeJS, Socket.io, MongoDB, MongooseJS, SQLite, HTML/CSS, AWS, AJAX etc.

Self builded projects

- Designed and developed a tour booking web application with Pug, SCSS, ExpressJS, MongooseJS with JWT Authentication and advance coding standered, speed, security and error handling. Implimented complex backend like getting various statistics, proccessing images, mapbox with custom theme, markers and bounds, payments, email handler etc. Build the RESTful API for all features and released the postman documentation.
- Build a Chat web application with REACT, react router and Material UI with the functionality to create rooms and joining multiple rooms at a time with google authentication and firebase. Also hosted it using firebase hosting.
- Build an amazon clone with REACT, ExpressJS and firebase with firebase authentication and implimented real payments with stripe.

SKILLS

INTERESTS

ADDITIONAL SKILLS
